Date: 3/19/2014

Background & Context

Smoking on campus is an issue that has been discussed by students and university administration over the last few years. Currently the University’s Central Health & Safety Committee has been discussing the policies surrounding E-Cigarettes and plans to discuss smoking on campus as a whole in the near future. Before Western Washington University begins to take action on the existing smoking policies it’s important that the issue goes to referendum so the Associated Students of Western Washington University are given the chance to take a stance on the smoking policies on campus.

Summary of Proposal

Proposed Referendum language:

“Shall the Associated Students of Western Washington University support the implementation of policies that would establish Western Washington University as a smoke-free campus?”
