# Transit solutions that enhance your business

Our integrated suite of services work together to help you manage your systems and improve the transit experience.

## GPS LOCATION SERVICES

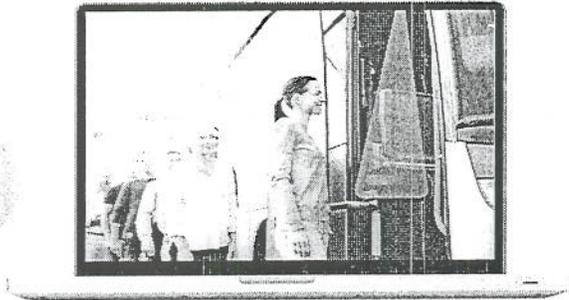

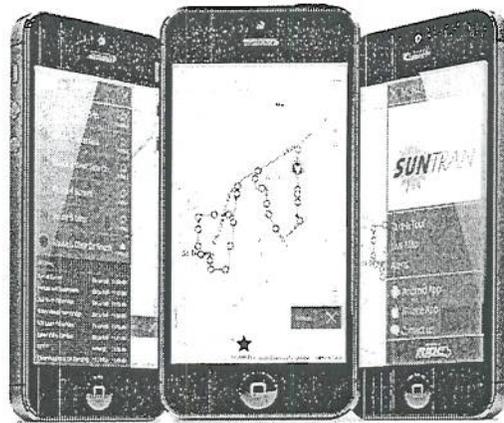

A live map shows the current location of all vehicles on route and provides an estimated time of arrival. Vehicle locations are updated every few seconds. Route and vehicle icons are color-coordinated for easy identification.

## CUSTOM MOBILE APP

Our mobile app allows riders to access vehicle location and route information, ETAs, and important announcements. No more guessing and waiting. Clients have the option to request a custom built app.

*Download the mobile app.  
Available on IOS and Android.*

### PASSENGER COUNTING

Tracking ridership and capacity is easy and accurate using our advanced automatic passenger counter technology.

We also support use of your existing tablets for GPS and passenger counting featuring a driver-assisted interface.

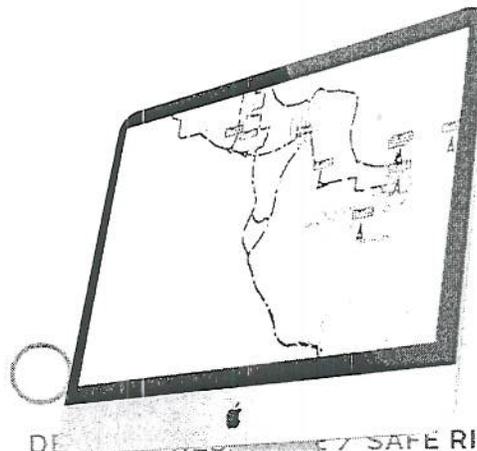

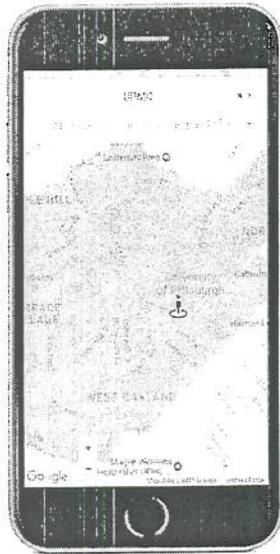

[Learn More](#)

### ADMINISTRATIVE MAPS

The administrative map provides administrators access to view all vehicles in the fleet. Enhanced reporting services allow for tracking and reporting of vehicle performance including history, location, and speed.

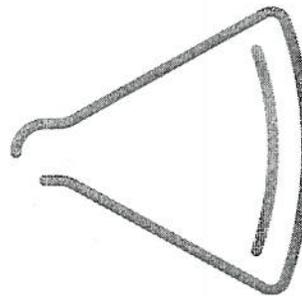

### DEVELOP YOUR OWN SAFE RIDE

Our *QuirbDido* allows riders to request a pick-up and drop-off based on geofenced areas and customized stops. Think Uber, only your way.

[Learn More](#)

### AUTOMATED VOICE ANNUNCIATION

Keep riders informed with custom messages. Arriving and departing announcements are easily customized and integrate with an existing speaker system. Geo-fenced areas prompt an automatic message to riders.
