

Explanation for these documents:

A student has come to the AS VP for Student Life on behalf them self and other students to discuss the possibility of making WWU a Smoke-Free Campus. The documents included include previous board discussions from 2014 around the same topic, in addition to information from other smoke free universities. The AS VP for Student Life hopes to give the board and the public access to this information to start forming a conversation about whether or not Western should re-address this topic and move forward with it. There are a lot of different ways this topic can be “moved forward,” but for now this is just an info item.
