

Hi all,

I took the agenda proposals and final language document to the AS Board of Directors today as an info item. Both will continue to be info items next week, and will be passed as action items during final's week.

Here is all of the feedback I received from the AS Board:

Civic education-

When we do the training about how we do it

Putting it first then moving onto higher ed

Flow better

Mention which revenue source to focus on with what legislator

Mention which ones are going to be easier to get or more controversial

Justifying why we are talking about sex ed

How sexual active ppl are in college

Are experimenting more

Need to know how to be protected

Why we in higher ed are bringing this

Guttmacher- research website about health benefits of sex education

Talking about consent and tying it with survivors of sexual assault

Some schools don't talk about consent

If we talk about consent now we don't have survivors later

Researching countries like Sweden because they have the lowest levels of sexual assault because they base their sex ed on pleasure

Data for student unionization

Difference in hourly and salaried positions

Look into repercussions

Word it in a way about that's not doing something weren't supposed to do

Some students have expressed really stressed about how much work they have to do within 19 hrs.

Some students expressed concern about not being able to work for more than 19 hrs.

Careful about statements that make it sound like we don't support the rehabilitation of survivors

Bring back effect of Betsy devo's rules

Expand student unionization section

And for the xth year we are bringing this back and still pushing for this and we're still living our daily lives affected by this

Maybe the ones that come back for a number of times,

One pagers for each agenda item

Give some to legislators

Using the videographer that present the data in a more fun way

Educate the student body and the legislators

Think about how adding how many times we've brought that back adds weight

One pagers on each of the taxes

Which legislator's to focus on the one pagers

Personalize to each group what to focus on in the meeting
